

# B & A PLANT HIRE

*Wet and dry plant hire solutions*

## 2008 Sterling LT9500 Tip Truck

With a heavy-duty Hardox body and light tare-weight, our Sterling tipper is able to legally carry payloads of 12.5 Tonnes. Because of the heavy-duty body we are able to carry all types of loads including shot-rock and demolition waste. For use on jobsites with higher safety standards, we have fitted large Fire extinguishers in and out of the cab, an 80-channel two-way radio, flashing beacon, first aid kit and more...

Along with our tag trailer, we can cost effectively transport machinery up to 15 tonnes to and from our job sites cost effectively and allowing us the flexibility to utilise the tipper whilst on site.

All of our machinery is setup to be compliant with the stringent safety and reliability requirements of modern-day job sites and as standard, our equipment is supplied with up to date maintenance records, plant risk assessments and electronic Operator's manuals. With wet hire jobs, we pride ourselves on our experienced, multi-skilled operators whom are appropriately licenced, and familiar with our equipment and attachments.
